-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 June 2003.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8 and 10-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-8 and 10-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Part III DETAILED ACTION

Notice to Applicant(s)

This application has been examined. Claims 1-8 and 10-20 are pending.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-8 and 10-20 are rejected under 35 U.S.C. § 102(e) as being anticipated by Winston patent number 6,434,653 referred hereinafter "Winston".

As for claims 1, 10 and 17, Winston teaches a method for increasing control information from a single general purpose input/output (GPIO) mechanism (see figure 3, module detection unit 310 and column 4 line 50 to column 5 line 27, wherein the detection unit 310 detects card insertion for slot 103, 106), the method comprising:

utilizing a single GPIO mechanism with a socket on a computer system (see figure 3, module detection 310, line 311 and column 4 line 50 to column 5 line 27, wherein the detection module monitors the present of card insertion in slots 103, 106 via line 311); and

determining whether a first card, a second card, or no card is installed in the socket according to detected changes in signals state on a single line between the GPIO mechanism and the socket (see figure 3, module detection 310, line 311, module1 occupation signal, module 2 occupation signal and column 4 line 50 to column 5 line 27, wherein the detection generates module 1 and module 2 occupation signal correspondingly to the detection line 311. Further, figure 7, step 701 discloses if slots 103, 106 is occupied or not).

As for claims 2-5, 13-15, 20, Winston teaches wherein determining further comprises writing a signal in first state by a POST (power on self test) (see column 5 lines 40-65, wherein when power-on the BIOS stored in ROM will perform POST procedures and the lock-out unit 320 determines either the first or second connectors 103, 106 is vacant from the module 1, or module 2 occupation signals and asserts the lock-out signal which causes the power activation correspondingly).

As for claims 6-7, Winston teaches wherein the state of the GPIO mechanism changes in accordance with state changes by the POST routine, no card is installed in the socket (see figure 7, step 701).

As for claim 8, Winston teaches wherein one of the first and second cards pulls-up the signal line, and the other of the first and second cards pulls down the signal line (see figure 6, resistors 610, 611).

As for claims 11-12, Winston teaches wherein the first card occupies the socket, the single signal is pulled to a first logic gate (see figure 6, resistors 610, 611).

As for claims 16, 18-19, Winston teaches circuit comprises resistor-capacitor circuit (see column 2 lines 38-42, termination card).

Response to Arguments

In response to the applicant arguments that Winston teaches away from the invention that is the use of a single line signal line. Applicant acknowledges that in one of the embodiments of Winston teaches line 311 as being a single line signal connecting to connecting to each slot connector as discloses in figure 3. Line 311 sends detection signals to the module detection unit 310 accordingly based on the conditions of the slot connectors (column 4 lines 55-60). For this reason, Line 311 is a single line signal sending detection signal states to the module detection unit 310. This teaching is equivalent to what is claimed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
